Information Security & Emergency Management Professional

Strategic business continuity, cybersecurity and risk management leader with 10+ years of experience in enterprise-class compliance, business continuity, and advisory roles. 20+ years in emergency/incident response and management. Adept at leveraging AI frameworks and modern AI tools to deploy agents enabling analysis and optimization at machine speed, with human in the loop governance. Skilled at guiding stakeholders through ethical, regulatory, and technical risk considerations in cloud-native and hybrid environments.

Core Competencies

- Cybersecurity, Incident Response, Business Continuity & Disaster Recovery (BC/DR)
 - Agentic AI development, integration and deployment.
 - System integration (Python, YAML, Shell&Bash, SQL, Webstack, Docker, etc.)
 - Stakeholder Engagement & Cross-Functional Collaboration
 - Vendor & Third-Party Risk Management
 - Regulatory & Compliance Alignment (NIST, ISO 27001, ISO 22301 and more)
 - Generative AI & Automation Tools: Databricks, Cursor, n8n, OpenWebUI, Ollama, OpenAI API, ChatGPT, MSFT CoPilot, and more
 - Cloud Platforms: AWS, Azure, GCP | Tooling: Fusion RM, Smartsheet, Atlassian, Salesforce, Office365, and more
-

Professional Experience

Nike, Inc. — Beaverton, OR

Lead Information Security Analyst | Aug 2018 – Present

- Security Automation & AI Integration: Proficient with system integration tools and techniques (Docker, Python, SQL, Shell, Bash, YAML, Webstack, etc.) Overhauled recovery workflows by deploying n8n integrations and leveraging AI tools (Cursor, Copilot, Databricks) to automate threat modeling, streamline documentation, and reduce manual assessment overhead.
- Owned and orchestrated the full-spectrum Technical Recovery Assessment (TRA), serving as the single point of accountability for the critical database of a multi-hundred-app ecosystem.
- Program Ownership & Architecture: Scaled the TRA program from inception to a self-sustaining model, managing high-fidelity data that serves as the source of truth for cross-functional Incident Response and Infrastructure teams.
- Technical Incident Response & Crisis Management: Acted as a core technical consultant during major technology incidents, translating complex failure modes into actionable mitigation strategies and rapid recovery paths.
- Cloud-Native Resilience: Validated recovery strategies across hybrid-cloud environments (AWS, Azure, GCP, and more), ensuring alignment between technical RTO and RPO and business-critical requirements.
- Third-Party & Vendor Risk: Performed deep-dive technical audits of SaaS and Tier-1 providers, evaluating SOC 1, SOC 2, ISO 27001, and ISO 22301 compliance to ensure end-to-end supply chain resilience.
- Validation & Testing: Coordinated enterprise-wide Disaster Recovery exercises, moving beyond tabletops to validate actual technical failover capabilities in complex environments.
- Cross-Functional Tool Management: Architected and maintained the resilience tech stack, including Fusion RM, Smartsheet, and Atlassian, ensuring data integrity for downstream risk reporting.

Technical Recovery Analyst (Contract) | May 2018 – Aug 2018

- Spearheaded the development and implementation of the enterprise Technical Recovery Program, transitioning the organization from ad-hoc disaster recovery to a standardized, metric-driven resilience framework.
- Program Development: Built and scaled core recovery processes, products, and communication plans from the ground up to ensure consistent organizational readiness.
- Risk Mitigation: Executed end-to-end technical risk assessments, translating complex infrastructure requirements into actionable recovery strategies and failover plans.
- Stakeholder Orchestration: Cultivated strategic partnerships with IT and business units to align recovery capabilities with evolving technology roadmaps and operational needs.
- Exercise Execution: Led the design and coordination of cross-functional recovery exercises, validating technical capabilities through hands-on testing and simulation.

- Metrics & Governance: Established KPIs and reporting frameworks to track program maturity, ensuring all recovery plans remained compliant and audit-ready.
- Documentation & Tooling: Authored comprehensive recovery procedures and managed the deployment of technical tools to streamline the recovery lifecycle.

Carilion Clinic — Roanoke, VA

Business Development Manager | Oct 2015 – Oct 2017

- Modernized emergency medical and air-transport operations (Life-Guard) by integrating advanced geospatial analytics, virtual reality training, and digital infrastructure to enhance patient care and community safety.
- Geospatial Engineering: Architected and managed complex geographical databases using Google Maps and Fusion Tables APIs to optimize ground and air ambulance transport strategies.
- VR & Immersive Training: Designed and programmed 360° virtual reality (VR) solutions, pioneering immersive training environments for healthcare providers to improve pre-hospital emergency response.
- Quality & Data Analytics: Developed comprehensive audit workbooks and analytic programs to track QA/QI metrics, driving data-informed improvements in patient transport services.
- Full-Stack Development: Engineered custom websites and mobile applications tailored for internal operational efficiency and external stakeholder engagement.
- Public Safety Advocacy: Led the Drone Safety Awareness Campaign, educating the public on airspace risks to air medical flights and establishing industry best practices for safe operation.
- Strategic Communications & Leadership: Represented the organization as a national lecturer/instructor and managed high-visibility project teams to meet critical healthcare objectives.

Additional Early Roles (2011–2015): OHSU (Emergency Transport Specialist), International SOS (International Operations Coordinator), Near Southwest Preparedness Alliance (Operations Specialist).

Education

- **M.S., Safety, Security & Emergency Management** — Eastern Kentucky University, 2013
 - **B.A., Interdisciplinary Studies (Geosciences & Psychology)** — Virginia Tech, 2011
-

Certifications & Training

- Certified Business Continuity Institute (CBCI)
 - Frameworks: NIST, ISO 27001, ISO 22301, FEMA ICS/NIMS
 - Incident Command and Emergency Management Training
-

Additional Skills

- Generative & Responsible AI Tools: Databricks, Cursor, n8n, MCPs, OpenWebUI, Ollama, OpenAI API, ChatGPT, MSFT CoPilot
- Platforms: GitHub, Firebase, Microsoft 365, Smartsheet, Atlassian
- Technical: Linux, Windows, Virtualization (Proxmox, VirtualBox), Networking & Security Tools (Wireshark, hashcat)
- Languages: English (Fluent)
